

LED ceiling CONVERSION KITS

LED ceiling conversion kits provide an attractive and cost-effective option for outdated egg crate-style or yellowing plastic-lit covered cab ceilings. Environmentally friendly and energy efficient, these conversions can be performed with minimal downtime and offer sleek and sophisticated designs to fit the aesthetic needs of your building.

Benefits

- Reduces cab interior heat
- Eco-friendly & energy efficient
- Little-to-negligible maintenance
- Decrease out-of-pocket costs using existing frame
- Increased product life designed for continuous use
- Meet fire resistance & light-level code requirements
- Attractive & sophisticated LED down light ceiling designs
- Quick installation due to lightweight components & hardware

Available Options

- Available in custom colors
- Emergency lighting battery back-up
- Energy saving auto light and fan control
- Improve design aesthetics w/ addition of new frame

LED Conversion can...

... reduce elevator lighting energy consumption by up to 90% (SOURCE: *Electronic Lighting Science Case Study 4/8/11*)*

LED Conversion can...

... provide an immediate and long-lasting cab upgrade while decreasing overall building maintenance costs*

**(There are a number of LED ceiling conversion kits with varying styles and capabilities. Consult with your sales associate to determine the best solution for your building.)*
